Application for Data Scientist (m/w/d)

Dear Hiring Team,

I am writing to apply for the Data Scientist position at Rewire. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, with a solid base in machine learning, data analysis and Python.

My first data science role was an internship at Covestro, where I predicted the outcome of prepolymer synthesis from sensor time series. I built lag features and rolling statistics, and compared Random Forest, XGBoost and an LSTM against the chemists' empirical curve fitting. The models helped spot batches likely to miss specification early, and a Streamlit dashboard let the chemists try parameter changes before a physical run. At Cognizant I built ARIMA, SARIMA, Prophet and LSTM models for EV load forecasting, and the LSTM reached 96% test accuracy.

For my Master's thesis I evaluated RAG systems with RAGAS and PytrecEval against chemist-provided ground truth and benchmarked multilingual embedding models on over a million data chunks. At Kniit I was the sole developer of a multi-agent extraction pipeline for the German energy sector, measured against ground truth derived from SAP systems. Precision and recall went from 33%/45% to 93%/90%, and a plain code-based pipeline for one high-volume source removed a projected $200,000 LLM budget.

Much of this work was done with people who were not data scientists: chemists, SAP experts and the CTO. At Covestro I also advised business stakeholders on how an agentic AI workflow could support their decisions. I learned to turn their questions into something testable and to explain the results in their terms.

Your posting describes data and AI projects done together with clients, with real ownership from the start. That is the kind of work I want to do, and a team that also builds training and thought leadership around it suits how I like to learn.

I am based in Heidelberg, available from 15 November 2026, and I hold an EU Blue Card. I am happy to travel regularly to client sites. My German is B1 and I work in English every day. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
