Application for Forward Deployed AI Engineer

Dear Hiring Team,

I am writing to apply for the Forward Deployed AI Engineer position at Next Ventures. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and my best work so far has been where I sat close to the people who would use the system.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO and working with SAP domain experts. Four LangGraph agents run in parallel on regulatory and technical documents. I evaluated the pipeline against a ground truth built from SAP data, and precision and recall rose from 33% and 45% to 93% and 90%. Where an LLM was not needed, I replaced it with deterministic code and cut a projected $200,000 LLM budget to almost nothing.

Getting AI into real workflows is where I have spent most of my time. I built a Model Context Protocol service that gives agents access to our knowledge graph in milliseconds, and Expert Interface, a React and Python microservices app on Azure where domain experts approve changes before they go live. At Covestro, as an AI consulting intern, I talked to business stakeholders about how they make decisions, then built a LangGraph application with FastAPI REST APIs and deployed it with Docker, AWS CDK and GitLab CI/CD. My thesis there was about evaluating RAG systems with RAGAS against ground truth from chemists.

I have not done external consulting for paying clients, and I would not pretend otherwise. My client contact has been with internal business users and domain experts, and I would be learning how to run executive-level engagements from your team.

What appeals to me about this role is the mix of client conversation and code, and the expectation that systems get past the demo and into production, with evaluation and monitoring built in.

I am based in Munich, hold an EU Blue Card, am happy to travel to client sites and can start on 15 November 2026. My German is at B1 level and improving, and my English is business fluent. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
