Application for Founding Engineer, Industrial AI

Dear Hiring Team,

I am writing to apply for the Founding Engineer position at Segmantix. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the last year I spent as the only developer on an agentic system, which is close to the kind of scope you describe.

At Kniit I own a knowledge-extraction system for the German energy sector end to end and report to the CTO. It runs four LangGraph agents in parallel (extraction, relationship analysis, consolidation and reflection). I built the evaluation against a ground truth from SAP data, and precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source I replaced the LLM with deterministic code and cut a projected $200,000 LLM budget to almost nothing. Knowing when an agent is the wrong tool is part of how I work. Domain experts approve changes in a web interface I built before they are applied, which is the guardrail side of the same problem.

I talk to the people who use the system. At Kniit that means SAP experts, and at Covestro I sat with business stakeholders to map their decision workflows before I built a LangGraph application for them, with a FastAPI backend, Docker and AWS CDK deployment. My Master's thesis there was on evaluating RAG systems with RAGAS. I also use Claude Code and custom skills daily, and I review what the agents produce before it ships.

I have not worked with 3D data or point clouds, so that part would be new to me. I have a bachelor's degree in mechanical engineering and have spent time in a chemical manufacturing environment, and I am used to learning a domain from the people who work in it.

A team of two founders building industrial AI for 3D laser scanning, with design partners already on board, is the kind of place where one engineer can shape the product. I would like to be that engineer.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. My English is business fluent and my German is at B1 level. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
