ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software development. Specialized in Python automations and API integrations, and in AI-supported workflows built on LLMs and agentic systems. Most recently sole developer of an agentic knowledge-extraction system for the German energy sector, working directly with domain experts and the CTO, from data pipelines to internal tools on Azure.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present Muldestausee, Germany

- Sole developer owning the full knowledge-extraction pipeline end-to-end – data ingestion, chunking, prompt engineering, and indexing (agentic, deterministic, and monolithic strategies) – reporting directly to the CTO and working with SAP domain experts across the German energy sector to turn their needs into running data workflows.
- Engineered a deterministic (code-based) extraction pipeline for a second, high-volume source stream, cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing extraction accuracy toward 100%.
- Designed and optimized multi-agent extraction algorithms (LangGraph: entity-extraction, relationship-analysis, consolidation, and reflection agents running in parallel) for knowledge extraction from complex regulatory and technical documents, driving precision/recall from 33%/45% to 93%/90% via an SAP-system-derived ground truth.
- Designed and implemented a Model Context Protocol (MCP) query service exposing the knowledge graph through an API for millisecond-latency retrieval, integrated directly into Claude Code for agentic development workflows.
- Developed Expert Interface, an internal tool for graph curation (React frontend, Python microservices backend) deployed on Azure, enabling domain experts to validate and approve knowledge-graph changes.
- Delivered as an AI-augmented engineer – using Claude Code, custom skills, and agentic coding workflows for rapid automation and high-quality development grounded in clean code principles.
- **Tech stack: Python, APIs, Postgres, MongoDB, Neo4j, FastAPI, React, LangGraph, LangChain, LiteLLM, MCP, GraphRAG, RAG, Vector Search, Azure, Docker, Kubernetes**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 Leverkusen, Germany

- Worked with business stakeholders to understand their decision-making workflows and built an AI-supported workflow for them: an agentic application designed and deployed with LangGraph for vector database queries, general inference, and summarization tasks.
- Developed a Python backend with FastAPI and a React-based front-end, using Postman for API testing.
- Built and containerized the entire stack with Docker and deployed it to AWS using CDK, adhering to clean code practices. Version-controlled via GitLab, with CI/CD integration.
- **Tech stack: Python, FastAPI, Postman, React, LangGraph, LangChain, Docker, AWS, CDK, EC2, Lambda, GitLab, GitLab CI/CD**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 Leverkusen, Germany

- Automated RAG's Generation and Retrieval evaluation with RAGAS and PytrecEval, comparing model answers to chemist-provided ground truth.
- Built AWS cloud infrastructure with Lambda, SQS, and DynamoDB for PrismaChat RAG evaluation using CDK.
- Benchmarked multilingual embedding models on over 1M data chunks of Covestro's internal chemical data.
- Designed RAG pipelines, focusing on chunking strategies, vector databases, indexing, and fine-tuning models for optimized retrieval.

- **Tech stack: Python, Scikit-Learn, PyTorch, TensorFlow, LangChain, Hugging Face Transformers, RAGAS, PytrecEval, AWS (S3, EC2, VPC, Lambda, SQS, DynamoDB, CDK), Azure AI Search, Docker, Streamlit, Vector Databases**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost, and LSTM models to predict prepolymer synthesis outcomes (e.g. viscosity, reaction progression) from time-series process data, evaluating tree-based vs. deep learning approaches for this tabular/temporal hybrid problem.
- Engineered lag features and rolling statistical windows from raw sensor time-series (temperature, reaction time, process variables) to feed the tree-based models, while feeding raw sequences directly into the LSTM.
- Benchmarked model performance against traditional empirical curve-fitting methods, improving early identification of batches likely to deviate from target specification.
- Deployed an interactive Streamlit dashboard exposing model predictions to chemists in real time, letting them simulate parameter changes and see predicted outcomes before running physical batches.
- **Tech stack: Python, Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, SciPy, Matplotlib, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XG-Boost regressor, FB Prophet, LSTM models for time series analysis for EVs.
- Developed LSTM, achieved 96% test accuracy and strong performance on unseen data.
- **Tech stack: Python, Scikit-Learn, TensorFlow**

PROJECTS

Project: n8n AI Workflow Hub | n8n | Python | FastAPI | Claude API | Postgres | Docker

- Self-hosted n8n workflows for lead capture and routing: incoming requests arrive via webhooks and email, an LLM (Claude) qualifies them and drafts answers from a small RAG knowledge base, and results are pushed to a CRM through REST APIs, with monitoring, error handling, logging and an approval step for sensitive actions. Runs in Docker Compose with Postgres and a FastAPI mock CRM.

TECHNICAL SKILLSET

- **Programming:** Python, SQL
- **Integrations & Backend:** REST APIs, FastAPI, Python microservices, Postman, MCP, n8n (project), React(beginner)
- **AI & Agents:** AI-supported workflows, Agentic Workflow (LangGraph), LLM APIs, RAG, NLP (LangChain, Hugging Face transformers, NLTK), Machine Learning (Scikit-Learn), Deep Learning (PyTorch, TensorFlow), Claude Code
- **Databases:** Postgres, SQL, MongoDB, Neo4j, Vector Databases(Qdrant, Pinecone, Azure AI Search); data analysis (Pandas, Streamlit)
- **Cloud & DevOps:** Docker, Kubernetes, Azure, AWS- S3, EC2, Lambda, SQS, DynamoDB, CDK; Git, GitLab CI/CD
- **Methodologies:** Agile

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Minor in Computer Science & Engineering — July 2019 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

LANGUAGES & PUBLICATION

German (B1) | English (Business Fluent) | Hindi (Fluent) | Telugu (Native)
