### Application for AI Engineering Consultant (all gender)

Dear Hiring Team,

I am writing to apply for the AI Engineering Consultant position at ALTEN. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic knowledge-extraction system, and I enjoy helping engineering teams work out where AI agents actually save them time.

At Kniit I built a multi-agent extraction pipeline in LangGraph for regulatory and technical documents. I measured it against ground truth derived from the client's SAP system and raised precision and recall from 33% and 45% to 93% and 90%. I also wrote an MCP query service over the knowledge graph and plugged it into Claude Code, and I work daily with agentic coding workflows and custom skills. Reviewing AI-generated output before it is used is part of how I work, which is the same governance question your role puts at the centre.

The consulting side is familiar to me too. As an AI Consulting Intern at Covestro I talked to business stakeholders about how they make decisions, advised them on where agentic AI could help, and then built and deployed the application with Python, FastAPI, React, Docker and GitLab CI/CD. At Kniit I worked with SAP domain experts, and I built a web interface where they approve changes to the knowledge graph before they go live.

On the technical side, I know RAG well from my thesis at Covestro, where I evaluated RAG pipelines with RAGAS and benchmarked embedding models on more than a million chunks. I have deployed on Azure (AI Search, Kubernetes) and AWS, and I work in Python, SQL, Git and CI/CD every day. I have not yet worked with Microsoft Copilot or Azure DevOps in a professional setting, but the tooling around them is close to what I already use.

ALTEN puts engineers in aerospace, medical technology, rail and automotive, so AI adoption there means fitting agents into real toolchains with real quality requirements. That is the kind of work I want to do, and workshops and coaching for engineering teams appeal to me as much as the building.

I am based in Munich, hold an EU Blue Card, can start on 15 November 2026 and am happy to travel to client sites. Thank you for considering my application. I would welcome a conversation.

Kind regards,

**Chandu Prasad Bhairapu**
