Application for AI Engineer / KI-Spezialist für Produktintegration

Dear Hiring Team,

I am writing to apply for the AI Engineer / KI-Spezialist für Produktintegration position with your client in Mainz. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic system that runs inside a larger backend landscape.

At Kniit I built a multi-agent extraction pipeline in LangGraph (entity-extraction, relationship-analysis, consolidation and reflection agents) and raised precision and recall from 33% and 45% to 93% and 90%, measured against ground truth from the customer's SAP system. I also wrote a Model Context Protocol service that gives agents access to the knowledge graph with millisecond latency, and an expert web interface (React, Python microservices on Azure) so domain users could review what the AI produced. Measuring answer quality and tuning prompts was part of the daily work there.

At Covestro I designed and deployed an agentic application with LangGraph, with a React front end and a FastAPI backend, containerized with Docker and shipped to AWS with CDK and GitLab CI/CD. For my Master's thesis I evaluated RAG systems with RAGAS and PytrecEval against chemist-provided ground truth, so I know how to put numbers on the quality of an AI feature before it reaches users.

Python is my main language, and I am used to working with Postgres, MongoDB and Neo4j behind AI services. In my consulting internship I spoke with business stakeholders about their workflows and turned that into a concrete AI use case, which is the idea-to-production path your posting describes. Your mix of support assistants, chatbots and automated summaries of statistics is a good fit for that way of working, and I would like to work with a development team that owns a classic backend.

I am based in Mainz, hold an EU Blue Card and can start on 15 November 2026. I am happy to travel when needed. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
