Application for AI Software Engineer

Dear Hiring Team,

I am writing to apply for the AI Software Engineer position at Jet HR. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently multi-step LLM agents and the knowledge pipelines behind them.

At Kniit I was the sole developer of an agentic knowledge-extraction system for the German energy sector. Parallel LangGraph agents for entity extraction, relationship analysis, consolidation and reflection took precision and recall from 33% and 45% to 93% and 90%, measured against ground truth from the customer's SAP system. I also built an MCP query service on top of the resulting knowledge graph, so other agents get structured context with millisecond latency. It runs inside Claude Code today.

The data side of your role is work I already do. I owned ingestion, cleaning, chunking and indexing for that system, and for a second high-volume source I replaced LLM calls with a deterministic pipeline, which cut a projected $200,000 LLM budget to near-zero running cost. In my Master's thesis at Covestro I built the evaluation for a RAG system with RAGAS and benchmarked embedding models on more than one million chunks, so I know how to keep a knowledge base measurable as it changes.

Shipping to production matters to me more than demos. At Covestro I built an agentic LangGraph application with a React front end and a FastAPI backend, containerised it with Docker and deployed it to AWS with CDK and GitLab CI/CD. I have not used dbt, Snowflake or Airflow professionally, but I work in Python and SQL every day and am comfortable picking up a data platform stack.

Jet HR's description of the Data team as a function that builds the platform and the AI products on top of it is what draws me. Owning an agent from logic to infrastructure, inside a team of data and AI engineers, is how I like to work. I can work fully remotely in a time zone compatible with Italy, I am based in Germany with an EU Blue Card, and I can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
