Application for Software Engineer, AI Integrations

Dear Hiring Team,

I am writing to apply for the Software Engineer, AI Integrations position at your partner company. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic pipeline and the MCP service that exposes its results to coding agents.

At Kniit, a startup in the German energy sector, I designed and built a Model Context Protocol query service over a knowledge graph and integrated it into Claude Code, so developers could call it as a tool in their daily workflow. I work with Claude Code every day, including custom skills and agentic coding setups. The service sat next to Python microservices with REST APIs that I owned from ingestion to deployment on Azure, so I know what it takes to keep an API-facing component stable once other people depend on it.

At Covestro I built a FastAPI backend and containerised the stack with Docker, then deployed it to AWS with CDK and GitLab CI/CD. I tested the endpoints with Postman. For the thesis I wrote automated evaluation for RAG systems with LangChain-based pipelines, so measuring whether a change actually helps is a habit for me. That is the mindset I would bring to tracking which integration drives usage.

I should be honest about two gaps. I have not yet published packages to PyPI or npm, and my TypeScript is less deep than my Python. I am closing both by building a small CLI, MCP server and LangChain wrapper around a public REST API, released through GitHub Actions. I write setup guides and handover documentation as part of every project, and I am comfortable scoping work alone when requirements are still moving.

The idea of making a data service easy to use from coding agents, frameworks and cloud platforms is the part of this role that appeals to me most, and a fully remote, international team suits how I work.

I am based in Germany, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
