Application for AI Forward Deployed Engineer

Dear Hiring Team,

I am writing to apply for the AI Forward Deployed Engineer position at Databricks. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, mostly RAG and multi-agent systems that had to work for domain experts who were not engineers.

At Kniit I was the sole developer of a knowledge-extraction system for the German energy sector. I sat with SAP domain experts to understand the documents and the ground truth, built the multi-agent LangGraph pipeline and measured it: precision and recall went from 33%/45% to 93%/90%. For a second, high-volume source I replaced the LLM calls with deterministic code, which removed a projected $200,000 LLM budget. I also built an MCP query service and a React and Python curation app on Azure, and I handled the rollout and handover myself.

At Covestro I was an AI consulting intern working with business stakeholders on their decision-making workflows, and I deployed an agentic LangGraph application with FastAPI, React, Docker and AWS CDK. In my Master's thesis I evaluated RAG pipelines with RAGAS and benchmarked multilingual embedding models on over one million chunks. Earlier data science work there used scikit-learn, XGBoost and LSTMs on process data, and I have fine-tuned an open-source LLM with QLoRA.

Your posting describes engagements where the engineer owns the production rollout and advises the customer directly. That is the part of my work I like best, and an AI team that ships first-of-its-kind applications with customers is where I want to do it. To be open about gaps: I have three years of experience, not four, and I have not used the Databricks platform, Spark at scale, DSPy or Text2SQL in production. I would close those quickly, building on the Python, evaluation and cloud deployment work I already do.

I am based in Munich, available from 15 November 2026 and hold an EU Blue Card. I am happy to travel to customers every few weeks. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
