Application for AI Agent Engineer (m/f/d)

Dear Hiring Team,

I am writing to apply for the AI Agent Engineer position at Thüga SmartService. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of a multi-agent system that runs in production. Your role is about making agents useful for software development, and that is the work I do every day.

At Kniit I own a knowledge-extraction pipeline for the German energy sector and report to the CTO. Several LangGraph agents extract entities and relationships from regulatory documents, and reflection agents review what the others produce. I measured the output against a ground truth derived from SAP data, and precision and recall went from 33 % and 45 % to 93 % and 90 %. For one high-volume data stream I replaced the LLM with code-based extraction, which cut a projected $200,000 LLM budget to almost nothing. Measuring quality and cost instead of judging by feel is how I approach every agent I build.

I work with coding agents daily. At Kniit I use Claude Code with custom skills and agentic workflows to write, review and test code, and I built an MCP query service that exposes the knowledge graph to Claude Code as tools. The same codebase has Python microservices, a React front end and Docker deployments on Azure. At Covestro I wrote a LangGraph agent with a FastAPI backend and shipped it to AWS through a GitLab CI/CD pipeline, and in my thesis I automated RAG evaluation with RAGAS and PytrecEval. I have not used Codex or Cursor, but I expect to pick them up quickly next to Claude Code.

Thüga SmartService builds digital services for municipal utilities, and I already know the German energy sector from my work at Kniit. Setting up AI-native development practices for a team with a real toolchain is the kind of job I want next.

I am based in Munich, hold an EU Blue Card and can start on 15 November 2026. My German is at B1, and I work in English every day. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
