Application for AI & Platform Innovation Engineer

Dear Hiring Team,

I am writing to apply for the AI & Platform Innovation Engineer position at Vicoland. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the only developer of an agentic AI system at an early-stage startup.

At Kniit I owned a knowledge-extraction system for the German energy sector from design to deployment, reporting to the CTO. Four LangGraph agents run in parallel on complex regulatory and technical documents. I evaluated them against a ground truth built from SAP data, which is how precision and recall went from 33% and 45% to 93% and 90%. I also exposed the knowledge graph through an MCP service that I connected to Claude Code, and I work daily with Claude Code, custom skills and agentic coding workflows to ship quickly without giving up clean code.

Evaluation is a large part of how I work. In my Master's thesis at Covestro I automated the evaluation of RAG systems with RAGAS and PytrecEval against chemist-provided ground truth and benchmarked embedding models on more than a million chunks. As an intern there I built a LangGraph application with a React front-end and FastAPI backend, deployed on AWS with CDK and GitLab CI/CD, after working with business stakeholders on their decision workflows. At Kniit I also built a React and Python web app on Azure in which domain experts approve every change before it goes live.

Two gaps to be open about: I have not led a team or mentored engineers formally, and my React is at beginner level. I am used to owning a system alone and to talking technical decisions through with a CTO, and I would grow into the lead and mentoring part.

Vicoland's idea of Vicos made of freelancers, SMEs and AI agents, running on one platform and serving clients like BASF, Miele and Siemens, is a concrete test of human-agent collaboration at scale. After the Series A, building that platform with a small team is the kind of ownership I look for.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. My English is business fluent and my German is at B1 level. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
