Application for IT-Consultant Cloud & AI (m/w/d)

Dear Hiring Team,

I am writing to apply for the IT-Consultant Cloud & AI position at JL.Digital GmbH. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently an agentic LLM system for the German energy sector.

At Kniit I was the sole developer of an agentic knowledge-extraction pipeline for the German energy sector. I built multi-agent extraction with LangGraph and LLMs on complex regulatory documents, and moved precision and recall from 33% and 45% to 93% and 90% against ground truth derived from the customer's SAP system. I also built an MCP query service on top of the knowledge graph and connected it to Claude Code, so I know both sides of the Claude Code requirement: using it daily to ship quickly, and building services it can call through APIs.

On the cloud side, I built the Expert Interface at Kniit, a React and Python microservices web app running on Azure, and at Covestro I containerized an agentic application with Docker and deployed it to AWS with CDK and GitLab CI/CD. My thesis at Covestro covered RAG design and evaluation with RAGAS, including chunking, vector databases and embedding benchmarks on over a million chunks. I have not yet worked with n8n in a customer project, but I build against REST APIs and write Python every day, so picking up n8n workflows is a short step for me.

The customer-facing part of the role is familiar to me too. As an AI consulting intern at Covestro I sat with business stakeholders, learned how they made decisions, advised on where agentic AI could help, and turned that into a working application. At Kniit I was the technical contact for SAP domain experts.

JL.Digital's mix of Azure work, AI integration and automation, together with the chance to take certifications such as Azure and Claude, matches the direction I want to grow in. I am based in Frankfurt, hold an EU Blue Card, and can start on 15 November 2026. My German is at B1 level and my English is business fluent, so I would be improving my German on the job while working with clients. I am happy to travel to client sites. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
