Application for AI Engineer, Agentic Systems (Voice)

Dear Hiring Team,

I am writing to apply for the AI Engineer, Agentic Systems (Voice) position at Acto. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and for the past year I have been building multi-agent LLM systems that have to be correct, not just plausible.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO. It runs four LangGraph agents in parallel (extraction, relationship analysis, consolidation and reflection) over complex documents. I measured it against a ground truth built from SAP data, which took precision and recall from 33% and 45% to 93% and 90%. Where an LLM was not needed, I replaced it with deterministic code and cut a projected $200,000 LLM budget to almost nothing.

Tool use and memory are part of that work too. I built a Model Context Protocol service that gives agents access to a knowledge graph with millisecond retrieval, and a web app where domain experts approve changes before they are applied. At Covestro I turned stakeholder decision workflows into a LangGraph application with FastAPI APIs, deployed on AWS with Docker, CDK and GitLab CI/CD. My Master's thesis evaluated RAG systems with RAGAS, so measuring correctness and regressions of an agent is familiar ground.

I should be direct about voice: I have not shipped a voice agent in production. Real-time ASR and TTS pipelines, turn-taking and latency tuning would be new to me, and so would simulation-based testing tools like Coval or Bluejay. What I bring is the agent, retrieval, state and evaluation side, and I would learn the voice layer quickly from the people on your team who already know it.

Acto turns ERP, CRM and behavioural data into decisions that get executed, instead of one more dashboard, and you are doing it first in wholesale. Building agents that sit inside that loop, in chat and by voice, is work I would like to own with a small team.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. My English is business fluent and my German is at B1 level. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
