ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software development. Specialized in building AI-native full-stack applications end-to-end, from Python backends and React interfaces to LLM-powered features, AI agents and cloud deployment. Most recently sole developer of an agentic knowledge-extraction system for the German energy sector at an early-stage startup reporting directly to the CTO, backed by full-stack, backend and cloud deployment experience across enterprise and startup environments.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present Muldestausee, Germany

- Owned the knowledge-extraction pipeline end-to-end as sole developer at an early-stage startup, from data ingestion and chunking to prompt engineering and indexing (agentic, deterministic and monolithic strategies), reporting directly to the CTO and working with SAP domain experts across the German energy sector.
- Developed Expert Interface, a full-stack graph curation web app (React frontend, Python microservices backend, databases and integrations) on Azure where domain experts validate and approve knowledge-graph changes.
- Engineered a deterministic, code-based extraction pipeline for a second, high-volume source stream, cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing accuracy toward 100%.
- Designed and optimized the multi-agent orchestration in LangGraph (entity-extraction, relationship-analysis, consolidation and reflection agents running in parallel) for complex regulatory and technical documentation, raising precision/recall from 33%/45% to 93%/90% measured against an SAP-system-derived ground truth.
- Designed and implemented a Model Context Protocol (MCP) service that exposes the knowledge graph for millisecond-latency retrieval, integrated into Claude Code for agentic development workflows.
- **Tech stack: Python, React, FastAPI, Postgres, MongoDB, LangGraph, LangChain, LiteLLM, MCP, Claude Code, Neo4j, GraphRAG, RAG, Vector Search, Docker, Kubernetes, Azure**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 Leverkusen, Germany

- Designed and deployed an agentic AI application with LangGraph that routes decision-making across vector database queries, general inference and summarization.
- Built the Python/FastAPI backend and a React frontend, tested the APIs with Postman, containerized the stack with Docker and deployed it to AWS with CDK; versioned in GitLab with CI/CD pipelines.
- **Tech stack: Python, React, FastAPI, LangGraph, LangChain, Docker, AWS (CDK, EC2, Lambda), GitLab CI/CD, Postman**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 Leverkusen, Germany

- Automated evals of RAG generation and retrieval with RAGAS and PytrecEval, against chemist-provided ground truth, with serverless AWS infrastructure for PrismaChat RAG evaluation (Lambda, SQS, DynamoDB) built with CDK.
- Benchmarked multilingual embedding models on over 1M chunks of internal chemical data and designed RAG pipelines (chunking, vector databases, indexing, fine-tuning models for retrieval).
- **Tech stack: Python, RAGAS, PytrecEval, LangChain, Hugging Face Transformers, PyTorch, AWS (Lambda, SQS, DynamoDB, CDK), Azure AI Search, Docker**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost and LSTM models to predict prepolymer synthesis outcomes from time-series process data, and delivered a Streamlit dashboard for chemists to simulate parameter changes before running physical batches.
- **Tech stack: Python, Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XGBoost regressor, FB Prophet and LSTM models for EV load time-series forecasting; the LSTM reached 96% test accuracy with strong performance on unseen data.

PROJECTS

Project: Order Inbox Agent | Python | Django | TypeScript | Postgres | LLMs

- AI agent that reads purchase orders from email bodies, PDFs and Excel files, extracts customer, items and quantities, matches each line to a product catalog (exact, customer map, fuzzy, pgvector) and writes a sales order back to a mock ERP through a REST API.
- Django backend with Postgres and a TypeScript review screen where a sales rep confirms low-confidence matches; per-customer configuration and a labelled test set of orders run in CI.

Project: LLM Gateway | Python | FastAPI | TypeScript | LLM APIs

- Provider-agnostic abstraction layer over multiple LLM provider APIs with token budgeting, streaming, retries, and fallback between providers, logging latency, token usage, and cost for every request.
- KPI dashboard (React, TypeScript) for cost per request, latency percentiles, and evaluation pass rate on a test set; test suite generated with Claude Code and reviewed by hand, running in a CI pipeline.

TECHNICAL SKILLSET

- **Full-Stack & Backend:** React, Python, FastAPI, Python microservices, APIs, SQL, Postgres, Postman
- **Generative AI & Agentic AI:** LLMs, LangGraph multi-agent orchestration, LangChain, LiteLLM, MCP tools, evals against ground truth (precision/recall, RAGAS, PytrecEval), deterministic code-based extraction, prompt engineering, RAG, GraphRAG
- **AI-Assisted Development:** coding agents, Claude Code (custom skills, MCP integration, agentic coding workflows)
- **Data & Knowledge:** Neo4j knowledge graphs, MongoDB, Postgres, vector databases (Qdrant, Pinecone, Azure AI Search), Hugging Face Transformers, PyTorch, Scikit-Learn
- **Cloud & DevOps:** Docker, Kubernetes, Azure, AWS (EC2, Lambda, SQS, DynamoDB, S3, CDK), Git, GitLab CI/CD

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
Minor in Computer Science & Engineering
G Pulla Reddy Engineering College, Kurnool, India

PUBLICATIONS & CERTIFICATIONS
