ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software engineering. Specialized in machine learning, time-series forecasting and productionizing ML applications on AWS and Azure, from model development and evaluation to Docker and Kubernetes deployments. Most recently sole developer of an agentic knowledge-extraction system for the German energy sector, backed by Python and microservice development.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present Muldestausee, Germany

- Sole developer owning the full knowledge-extraction pipeline end-to-end – data ingestion, chunking, prompt engineering, and indexing (agentic, deterministic, and monolithic strategies) – reporting directly to the CTO and collaborating with SAP domain experts across the German energy sector.
- Developed, evaluated and refined multi-agent extraction algorithms (LangGraph: entity-extraction, relationship-analysis, consolidation, and reflection agents running in parallel) for knowledge extraction from complex regulatory and technical documents, driving precision/recall from 33%/45% to 93%/90% via an SAP-system-derived ground truth.
- Engineered a deterministic (code-based) extraction pipeline for a second, high-volume source stream, cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing extraction accuracy toward 100%.
- Designed and implemented a Model Context Protocol (MCP) query service exposing the knowledge graph for millisecond-latency retrieval, integrated directly into Claude Code for agentic development workflows.
- Developed Expert Interface, a graph curation web app (React frontend, Python microservices backend) deployed on Azure, enabling domain experts to validate and approve knowledge-graph changes.
- Delivered as an AI-augmented engineer – leveraging Claude Code, custom skills, and agentic coding workflows for rapid, high-quality development grounded in clean code principles.
- **Tech stack: Python, FastAPI, Docker, Kubernetes, Azure, microservices, LangGraph, LangChain, LiteLLM, Neo4j, MongoDB, Postgres, GraphRAG, RAG, MCP, React**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 Leverkusen, Germany

- Designed and deployed an agentic AI application using LangGraph to optimize decision-making workflows for vector database queries, general inference, and summarization tasks.
- Developed a React-based front-end and a Python backend with FastAPI, leveraging Postman for API testing.
- Built and containerized the entire stack with Docker and deployed it to AWS using CDK, adhering to clean code practices. Version-controlled via GitLab, with CI/CD integration.
- **Tech stack: Python(Backend), FastAPI, Docker, AWS, CDK, EC2, Lambda, GitLab, GitLab CI/CD, React(Frontend), LangGraph, LangChain, Postman**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 Leverkusen, Germany

- Automated RAG's Generation and Retrieval evaluation with RAGAS and PytrecEval, comparing model answers to chemist-provided ground truth.
- Built AWS cloud infrastructure with Lambda, SQS, and DynamoDB for PrismaChat RAG evaluation using CDK.
- Benchmarked multilingual embedding models on over 1M data chunks of Covestro's internal chemical data, assessing performance with retrieval metrics.

- Designed RAG pipelines, focusing on chunking strategies, vector databases, indexing, and fine-tuning models for optimized retrieval.
- **Tech stack: Python, Scikit-Learn, PyTorch, TensorFlow, AWS (S3, EC2, VPC, Lambda, SQS, DynamoDB, CDK), Docker, LangChain, Hugging Face Transformers, RAGAS, PytrecEval, Azure AI Search, Streamlit, Vector Databases**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost, and LSTM models to predict prepolymer synthesis outcomes (e.g. viscosity, reaction progression) from time-series process data, evaluating tree-based vs. deep learning approaches for this tabular/temporal hybrid problem.
- Prepared and validated datasets of raw sensor time-series (temperature, reaction time, process variables), checking data quality and engineering lag features and rolling windows for tree models, raw sequences for the LSTM.
- Evaluated and benchmarked analytical model performance against traditional empirical curve-fitting methods, improving early identification of batches likely to deviate from target specification.
- Deployed an interactive Streamlit dashboard exposing model predictions to chemists in real time, letting them simulate parameter changes and see predicted outcomes before running physical batches.
- **Tech stack: Python, Pandas, NumPy, SciPy, Scikit-Learn, XGBoost, TensorFlow/Keras, Matplotlib, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XG-Boost regressor, FB Prophet, LSTM models for time series analysis for EVs.
- Developed LSTM, achieved 96% test accuracy and strong performance on unseen data.
- **Tech stack: Python, Scikit-Learn, TensorFlow**

PROJECTS

Project: Retail Demand Forecasting & Replenishment Optimizer | Python | SQL | XGBoost | SciPy | Streamlit

- Forecasting pipeline on synthetic multi-store retail sales: SQL feature engineering, seasonal-naive, SARIMA and XGBoost models in a rolling-origin backtest with prediction intervals, plus a SciPy linear-programming replenishment plan.

TECHNICAL SKILLSET

- **Programming & Databases:** Python, SQL, Postgres, Vector Databases (Qdrant, Pinecone, Azure AI Search)
- **Machine Learning & Forecasting:** machine learning pipelines, Scikit-Learn, XGBoost, time-series forecasting (ARIMA, SARIMA, Prophet, LSTM), Deep Learning (PyTorch, TensorFlow), Pandas, NumPy, SciPy, Matplotlib, Streamlit
- **Cloud & Deployment:** Amazon Web Services (S3, EC2, Lambda, SQS, DynamoDB, VPC, CDK), serverless (AWS Lambda), Azure, Docker, Kubernetes, FastAPI, microservices, GitLab CI/CD, Git, Agile
- **GenAI & NLP:** LangChain, LangGraph, RAG evaluation (RAGAS, PytrecEval), Hugging Face transformers, NLTK

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Minor in Computer Science & Engineering — July 2019 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
G Pulla Reddy Engineering College, Kurnool, India
