Application for Data Analyst - Advanced Analytics Finance (m/f/d)

Dear Hiring Team,

I am writing to apply for the Data Analyst - Advanced Analytics Finance position at adidas. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic system for the German energy sector, and I have worked on time series forecasting since my first job.

My forecasting work started at Cognizant, where I built ARIMA, SARIMA, XGBoost, Prophet and LSTM models for EV load. At Covestro I did a data science internship predicting prepolymer synthesis outcomes from sensor time series in Python. I engineered lag and rolling-window features, compared Random Forest, XGBoost and an LSTM against empirical curve fitting, and gave the chemists a Streamlit dashboard where they could change parameters and see the predicted result before running a batch. Explaining model results to non-technical users was the point of that project.

The agentic side of your team is close to what I do now. At Kniit I built multi-agent LLM pipelines with LangGraph on top of governed, domain-expert-approved data, and I measured them against an SAP-derived ground truth, which took precision and recall from 33% and 45% to 93% and 90%. In my Master's thesis at Covestro I evaluated RAG systems with RAGAS and PytrecEval against chemist-provided ground truth. Checking agent output for correctness, rather than trusting it, is a habit I bring to every project.

adidas interests me because Finance here is a place where forecasting and agents meet, with a forecasting engine on one side and AI products that work inside clear governance and human-oversight limits on the other. I would like to learn the Finance side from colleagues who know it. I have no hands-on Finance experience yet, nor with Databricks or Spark.

I am based in Nuremberg, hold an EU Blue Card, and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
