Application for AI Solutions Engineer

Dear tomorrow bird team,

I am writing to apply for the AI Solutions Engineer position at tomorrow bird. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, from classical machine learning to agents and MCP servers.

At Covestro, as an AI consulting intern, I worked with business stakeholders to understand their decision-making workflows, advised them on where agentic AI could support them, and translated their requirements into a solution approach. I then designed and built the application: a LangGraph agent that routes decision-making across vector database queries, general inference and summarization, with a FastAPI backend and React frontend, containerized with Docker and deployed to AWS with CDK.

At Kniit, a start-up working for the German energy sector, I am the only developer of an agentic knowledge-extraction pipeline and report directly to the CTO. I designed and implemented an MCP server that exposes our knowledge graph for millisecond-latency retrieval and integrated it into Claude Code, which I use with custom skills and agentic coding workflows. Measured against a ground truth derived from SAP system data, extraction precision and recall went from 33% and 45% to 93% and 90%. Not every use case needs an LLM: for a second, high-volume source stream I built a deterministic, code-based pipeline and cut a projected $200,000 LLM budget to near-zero recurring cost.

Your posting says explicitly that use cases are not only generative AI, which fits my background. As a data science intern at Covestro I compared Random Forest, XGBoost and LSTM models to predict synthesis outcomes from process data and built a Streamlit dashboard for chemists, and at Cognizant I built ARIMA, SARIMA, Prophet and LSTM models for EV load forecasting.

Your AI Potential Sprint combines what I did at Covestro and Kniit: working out with the people who own a process which AI approach fits, and then building and deploying it.

My German is B1 and my English is business fluent. I will be based in Bielefeld, hold an EU Blue Card, am happy to travel to clients, and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
