Application: Developer, Agentic Foundation for SAP Cloud ALM Development & Operations

Dear Hiring Team,

I am writing to apply for the Developer position in the Agentic Foundation for SAP Cloud ALM Development & Operations at SAP. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and for the past year my work has been agentic systems in Python, so a shared foundation for AI agents is a task I know well.

At Kniit GmbH I am the only developer on an LLM-based knowledge-extraction pipeline for the German energy sector. I own its architecture from ingestion to indexing and report to the CTO. The extraction runs on LangGraph agents that work in parallel, with a reflection agent that checks the others. Measured against ground truth from SAP systems, precision and recall went from 33% and 45% to 93% and 90%.

Your posting talks about making common capabilities reusable. I built something similar at Kniit: a Model Context Protocol service that gives any agent millisecond access to the knowledge graph, so the next agent does not need its own retrieval code. I use it with Claude Code and my own skills in daily development. The stack around it is Python microservices with FastAPI and a React interface on Azure.

Earlier, at Covestro, I deployed an agentic LangGraph application with a React frontend and a FastAPI backend to AWS with CDK and GitLab CI/CD, and in my master's thesis I built automated evaluation for RAG systems with RAGAS. That taught me to keep code in Git, test APIs with Postman and measure agents before anyone relies on them. I have not worked with crewAI or Java yet. Python and LangGraph are where I am strongest.

An engineering team that spends less time on setup and more on real problems is a goal I understand from building tools for domain experts who had no time for plumbing. I would like to contribute to that at SAP.

I am based in Heidelberg, hold an EU Blue Card and can start on 15 November 2026. I work in German at B1 level and communicate fluently in English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
