Application: AI Tech Consultant (all genders)

Dear Mr Körte,

I am writing to apply for the AI Tech Consultant position at BCG Platinion. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including a consulting internship where I advised business stakeholders on agentic AI.

At Covestro I worked as an AI Consulting Intern. I sat down with business stakeholders to understand how they make decisions, advised them on where agentic AI could help, and turned their requirements into a LangGraph application with a FastAPI backend and React front end. I containerized it with Docker and deployed it to AWS with CDK through a GitLab CI/CD pipeline, so I know the DevOps side of getting an idea into a client's hands.

At Kniit GmbH I am the only developer on an agentic knowledge-extraction pipeline for the German energy sector. I report directly to the CTO and work with SAP domain experts. I designed the multi-agent extraction in LangGraph and raised precision and recall from 33% and 45% to 93% and 90%, measured against ground truth from SAP systems. For a second, high-volume data source I chose a deterministic pipeline instead of an LLM, which brought a projected $200,000 LLM budget down to almost no running cost. Choosing the simpler architecture when it serves the client better is something I want to do more of.

I use AI tools every day. I work in Claude Code with custom skills I wrote, and I built a Model Context Protocol service that lets Claude Code query our knowledge graph directly. My Master's thesis was an automated evaluation framework for RAG systems, so I am used to measuring AI output before I trust it.

Your focus on tech and AI strategy together with scalable architectures matches how I like to work: understand the client's situation first, then design something that can run in their landscape. BCG Platinion's recent writing on the Agentic Software Factory shows the same approach, with humans governing outcomes and agents doing the work, and I would like to help clients get there.

I am based in Stuttgart, hold an EU Blue Card and can start on 15 November 2026. I am willing to travel to client sites. My English is business fluent and my German is at B1 level.

Thank you for considering my application. I would be glad to talk you through the Kniit pipeline and the consulting work at Covestro.

Kind regards,

Chandu Prasad Bhairapu
