Application for Creative AI Developer / Creative Technologist

Dear REWE Atelier team,

I am writing to apply for the Creative AI Developer / Creative Technologist position at REWE. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I like turning a rough idea into a working prototype that other people can try.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector. I build it with agentic coding, using Claude Code and custom skills, and I made the knowledge graph available to Claude Code through an MCP query service. I also built a React web app with Python microservices on Azure so that domain experts can review and approve changes themselves. Translating what non-developers need into a working tool is most of that job.

APIs and Python are my daily work. At Covestro I built an agentic LangGraph application with a FastAPI backend and a React front end, tested the endpoints with Postman and deployed it to AWS. As an AI consulting intern there I talked to business stakeholders about how they make decisions and turned that into the solution approach, which is close to what you describe between creatives and developers.

I have not yet shipped image or video generation in production, and I have no background in motion design or Adobe tools. My generative AI work so far is text-based: LLM pipelines, RAG, and fine-tuning an open-source model with QLoRA. The skills that carry over are connecting model APIs, automating multi-step workflows and judging quickly whether a new model is useful, and I would learn the image and video side in your studio setting.

REWE is already moving AI into its marketing and content production, and a team that tests generative tools for campaign work, from image models to creative automation, is a place where a developer can see results quickly. A twelve-month innovation project with designers sitting next to the people who build the tools is the kind of setup I do my best work in.

I am based in Cologne, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 level and I am improving it. Thank you for considering my application. I would be glad to show you how I work in a conversation.

Kind regards,

Chandu Prasad Bhairapu
