Application for AI Business / Requirements Engineer

Dear Mr. Lieberwirth,

I am writing to apply for the AI Business / Requirements Engineer position at Viridium Gruppe. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I like the work where business needs get turned into agents that people actually use.

At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector. I worked with SAP domain experts to understand what they needed, designed a multi-agent LangGraph system from it and raised precision and recall from 33%/45% to 93%/90% against ground truth from their SAP system. I also built an MCP query service and a web app where the experts review and approve changes. During my consulting internship at Covestro I sat with business stakeholders, learned how they make decisions, advised on where agentic AI could help and translated that into the solution approach. The agentic LangGraph application that came out of it ran with a React front end and a FastAPI backend on AWS.

Evaluation is the part of AI work I know best. My thesis at Covestro automated generation and retrieval evaluation of RAG systems with RAGAS against chemist-provided ground truth. I would bring the same habit to acceptance criteria, test scenarios and hallucination checks for your assistants. I work in agile teams and know prompts, knowledge sources and agent logic from the building side.

Viridium's customer service is the largest unit in the group, and building requirements management for AI there from the start is a chance to shape methods and standards. I would like to contribute to that. I do not hold an IREB certificate and have not worked with BPMN or Jira professionally yet; the EU AI Act and DORA are new topics for me that I would learn quickly.

I am based in Frankfurt am Main, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 level and improving; my working language is English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
