Application for Founding Engineer

Dear AI Futures team,

I am writing to apply for the Founding Engineer position you are hiring for in Berlin. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and for the past year I have done that as the only developer at an early-stage startup, reporting directly to the CTO.

At Kniit, a startup working for the German energy sector, I own the knowledge-extraction pipeline end-to-end. I decided how documents are ingested, chunked and indexed, and built a LangGraph system in which extraction, relationship, consolidation and reflection agents run in parallel. Measured against a ground truth derived from SAP system data, precision and recall went from 33% and 45% to 93% and 90%.

For a second, high-volume source stream I built a deterministic, code-based pipeline, which cut a projected $200,000 LLM budget to near-zero recurring cost. I also built an MCP service that exposes our knowledge graph with millisecond-latency retrieval, and a React and Python web app on Azure where domain experts approve changes to the graph.

Before that, at Covestro, I worked with business stakeholders to understand their decision-making workflows and then designed and built the agentic application: a FastAPI backend, a React frontend, Docker, and deployment to AWS with CDK, versioned in GitLab with CI/CD. My master's thesis there evaluated RAG systems with RAGAS and PytrecEval on serverless AWS infrastructure.

What appeals to me in this role is the stage. Joining before the product exists, taking features from idea to something customers use, and making the early architecture decisions with the founders is the work I would like to do next. At Kniit I am used to owning a system alone and being accountable for it.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. I would be glad to have a confidential conversation about the company. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
