Application for AI Engineer (m/f/d)

Dear Hiring Team,

I am writing to apply for the AI Engineer position at Johann Bunte. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I enjoy turning a department's day-to-day problem into a working tool.

At Kniit I was the sole developer of an agentic knowledge-extraction system for the German energy sector. I sat with SAP domain experts to understand what they needed, built multi-agent pipelines in LangGraph, and raised precision and recall from 33% and 45% to 93% and 90% against a ground truth taken from the customer's SAP system. I also built a web app for the experts to review and approve changes themselves, and I exposed the results through an MCP service and REST interfaces. At Covestro I advised business stakeholders on how an agentic workflow could support their decisions, then built it with a React front end and a FastAPI backend and deployed it with Docker on AWS.

Your posting asks for prototypes that are tested for benefit, feasibility and security before they reach daily use. My Covestro thesis was exactly that kind of testing: I automated the evaluation of RAG systems with RAGAS against ground truth supplied by chemists, so a pilot was judged on measured results. I have also worked on Azure, so the Microsoft environment is familiar ground. I take data protection and information security seriously when I decide what to build and which tools to trust with company data.

Bunte stands out to me as a 150-year-old construction company that names digitalization as one of its premises for the future, and that works with BIM and takes part in the RWTH Aachen research centre for building and infrastructure engineering. I would like to help bring AI into that work in a practical way, including showing colleagues how to use new tools.

I am based in Oldenburg, am willing to work at any of your locations, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 level. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
