Application for AI Consultant

Dear Hiring Team,

I am writing to apply for the AI Consultant position at Creatio. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including consulting work where I helped business stakeholders decide how AI agents could support their processes.

At Covestro I worked as an AI Consulting Intern. I sat down with business stakeholders, learned how they made decisions in their workflows, advised on where agentic AI could help, and turned their requirements into a solution approach. I then built and deployed that application: a LangGraph agent behind a React and FastAPI service, containerized with Docker and deployed on AWS with CDK.

My most recent role was at Kniit, where I was the sole developer of an agentic knowledge-extraction pipeline for the German energy sector. I worked with SAP domain experts and reported to the CTO. The multi-agent extraction raised precision and recall from 33% and 45% to 93% and 90%, measured against ground truth from the SAP system. I also built an MCP service that exposes the knowledge graph to other tools, and a web app on Azure where domain experts approve changes. So I have defined how agents connect to enterprise systems through APIs and MCP, and written down the guardrails: what an agent may decide on its own and what a person has to approve.

Creatio's move to unlimited users and agents, and the AI Studio for managing agents through their lifecycle, matches how I think about this work: the value comes from agents that run reliably inside real customer workflows, not from demos. I would like to help customers pick the use cases with the clearest business impact and then see them through to delivery.

I am based in Munich and hold an EU Blue Card, so no sponsorship is needed. I can start on 15 November 2026 and am happy to travel to customer sites. My German is at B1 level and my English is business fluent. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
