Application for Agentic AI Coding Engineer

Dear Hiring Team,

I am writing to apply for the Agentic AI Coding Engineer position you are recruiting for in the Memmingen area. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications. Your posting calls this a software engineering role first, and that is how I see my own work: the value comes from putting LLMs into a platform that runs real business processes, not from training models.

AI-assisted coding is how I build software. At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO, and I build it with Claude Code, custom skills and agentic coding workflows. I also built a Model Context Protocol service that exposes our knowledge graph to agents as a tool, so Claude Code can query it in milliseconds while I develop.

The system itself is a piece of agent orchestration: four LangGraph agents run in parallel for entity extraction, relationship analysis, consolidation and reflection. Measured against a ground truth derived from SAP systems, precision and recall went from 33% and 45% to 93% and 90%. Knowing where an LLM does not belong matters just as much in automation: for a second, high-volume source I wrote deterministic code instead, which cut a projected $200,000 LLM budget to almost nothing.

On the platform side I have built FastAPI services, Python microservices behind a React app on Azure, and at Covestro a LangGraph application deployed with Docker, AWS CDK and GitLab CI/CD. My main language is Python; I have not worked professionally in Java or TypeScript, or with Terraform, and would ramp up on them in your codebase with the same AI-assisted workflow.

An ERP-style process automation platform where agents call real services is exactly the kind of system I want to build next. I would be glad to hear more about the client and the team.

I will be based in Ulm, can work on-site in Memmingen every day, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
