Application for Junior Inhouse Consultant / Projektingenieur AI (m/w/d)

Dear Hiring Team,

I am writing to apply for the Junior Inhouse Consultant / Projektingenieur AI position at HOERBIGER. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, much of it in direct exchange with the business teams who use them.

At Covestro I worked on industrial process data. As an intern I compared Random Forest, XGBoost and LSTM models on sensor time series to predict prepolymer synthesis outcomes such as viscosity, and I built a Streamlit dashboard so chemists could try parameter changes before running a physical batch. In my later AI consulting internship I talked through decision-making workflows with business stakeholders, advised where agentic AI could help, and turned that into a LangGraph application with a React and FastAPI front end and backend, deployed with Docker and AWS CDK.

At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector and report directly to the CTO. I coordinated requirements with SAP domain experts, measured results against a ground truth from SAP systems, and raised precision and recall from 33%/45% to 93%/90%. For a second, high-volume data stream I built a deterministic version that cut a projected LLM budget of $200,000 to near zero. Deciding where an approach is worth its cost is part of every feasibility question I look at. The pipeline and its web interface run on Azure, so your preference for Azure fits my daily work.

Your posting describes taking ideas from the first workshop to a scalable solution, with AI, IoT and data applications for both edge and cloud. That is the kind of work I want to do. I have not run a project with IoT hardware or Linux-based edge devices yet, and I would build that knowledge in this role.

I am based in Munich, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 level and I am improving it; my English is business fluent. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
