Application for Data & Analytics Consulting Analyst (m/f/d)

Dear Hiring Team,

I am writing to apply for the Data & Analytics Consulting Analyst position at Oliver Wyman. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I like work that starts with a business question and ends in a number someone can act on.

At Covestro I was a data scientist intern on industrial process data. I compared Random Forest, XGBoost and LSTM models on sensor time series to predict prepolymer synthesis outcomes such as viscosity, tested them against traditional curve fitting, and built a Streamlit dashboard so chemists could try parameter changes before running a physical batch. In my AI consulting internship I talked through decision-making workflows with business stakeholders, advised where agentic AI could help, and turned their requirements into a LangGraph application.

At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector and report directly to the CTO. I measured every change against a ground truth from SAP systems and raised precision and recall from 33%/45% to 93%/90%. For a second, high-volume data stream I built a deterministic version that cut a projected LLM budget of $200,000 to near zero. My master's thesis evaluated RAG systems with RAGAS against chemist-provided ground truth, which is close to the validation of a GenAI chatbot you mention.

Your examples range from credit risk models in Python to an AI toolkit that reads news articles for rating downgrades. That mix of rigorous modelling and applied language models is what I want to work on, and the steep learning curve across industries suits me. I have not worked in financial services or risk management yet and would learn it on the job.

I am based in Berlin, hold an EU Blue Card, am fully willing to travel to client sites, and can start on 15 November 2026. My English is business fluent. My German is at B1 level and I am improving it, so I would need some time before client work in German. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
