Application for Machine Learning Engineer (MLOps)

Dear Hiring Team,

I am writing to apply for the Machine Learning Engineer (MLOps) position at Burckhardt Compression. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, with a good share of that time spent on data pipelines and getting models into production.

At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector, from ingestion and indexing to deployment on Azure with Docker and Kubernetes, reporting to the CTO. I checked the output against a ground truth built from SAP data, which is how precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source I replaced the LLM with deterministic code and cut a projected $200,000 LLM budget to almost nothing. A graph curation web app lets domain experts review changes before they go in, so data quality is checked by people who know the content.

Your products work on sensor data from machinery, and I have done that before. As a data scientist intern at Covestro I turned raw process sensor time-series into lag and rolling-window features and compared Random Forest, XGBoost and LSTM models for predicting synthesis outcomes. I also put the predictions into a Streamlit dashboard the chemists used before running physical batches. In my Master's thesis I built AWS infrastructure with CDK for evaluating RAG systems, and and in my internship there I shipped a containerized app with Docker and GitLab CI/CD.

My gaps are on the data platform side: I have not worked with Azure Databricks, Azure Data Factory, Hadoop or Spark in a job, though I know Azure and SQL. I expect to get productive on the Databricks setup quickly.

What interests me at Burckhardt Compression is that the models serve a physical product. Monitoring reciprocating compressors and gearboxes so that plants run safely is a clear use for reliable pipelines and deployed models, and a team of about 115 people with short decision paths suits the way I work.

I am based in Münster, hold an EU Blue Card, am happy to work on site in Rheine and can start on 15 November 2026. My English is business fluent and my German is at B1 level. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
