Application for Product Engineer (f/m/x)

Dear Hiring Team,

I am writing to apply for the Product Engineer position at Arbio. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the only developer on an agentic system that I owned from first idea to production.

At Kniit I was the sole developer of a knowledge-extraction pipeline for the German energy sector and reported directly to the CTO. I built multi-agent extraction with LangGraph that raised precision and recall from 33% and 45% to 93% and 90%, and a deterministic pipeline for a second data stream that cut a projected $200,000 LLM budget to near zero. I also built the Expert Interface, a React and Python web app on Azure where domain experts approve changes. I sat with the SAP experts to understand how they worked before I built anything, which is the way I would approach Arbio's property operations.

Agentic coding is how I work day to day. At Kniit I used Claude Code with custom skills, and I built an MCP query service that Claude Code uses directly. At Covestro I designed and deployed an agentic application with LangGraph, a React front end and a FastAPI backend, containerised with Docker and deployed to AWS with CDK and GitLab CI/CD. I also worked with business stakeholders there to turn their decision-making workflows into a solution approach. My TypeScript and Express experience is lighter than my Python, and I would pick it up quickly on top of React, PostgreSQL and MongoDB, which I already use.

What draws me to Arbio is that the agents act on real properties in Berlin, Hamburg, Vienna and Leipzig, with people kept in the loop where it matters, and that the guest messages are meant to be better than generic Airbnb replies. A five-person engineering team that owns problems instead of tickets is the setting where I do my best work.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application. I would be glad to show you my work in an interview.

Kind regards,

Chandu Prasad Bhairapu
