Application for AI Solutions Engineer (SITECO)

Dear Hiring Team,

I am writing to apply for the AI Solutions Engineer position at Stern Stewart & Co. for SITECO. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic knowledge-extraction system, from the first design to a web app that domain experts use.

At Kniit I owned that system end to end. I built multi-agent LLM pipelines with LangGraph, moved extraction precision and recall from 33%/45% to 93%/90%, and replaced one LLM-heavy stream with a deterministic pipeline that cut a projected $200,000 LLM budget to near-zero running cost. I also built an MCP query service over the knowledge graph and an Expert Interface (React frontend, Python microservices backend) on Azure, so the work did not stop at a demo. Its users were SAP domain experts, and I worked with them and the CTO directly to turn their questions into requirements.

At Covestro I worked as an AI consulting intern with business stakeholders on their decision-making workflows and built an agentic application with LangGraph, a React front end and a FastAPI backend, containerised with Docker and deployed to AWS with CDK and GitLab CI/CD. My master's thesis there covered RAG evaluation with RAGAS and a benchmark of embedding models on more than one million chunks, which taught me to measure whether an AI feature is actually useful before it is rolled out.

I am confident with Python, APIs, Git and databases such as Postgres, MongoDB and Neo4j. My production experience is in Python and React. TypeScript is the part of the toolkit I am still building up, and I am working on it through full-stack side projects.

SITECO's lighting business gives a portfolio-wide AI role a concrete setting: use cases that start in a business problem and have to survive in operations. That is the kind of work I like, and working close to management and domain experts, as I did with the CTO and SAP experts at Kniit, is how I do it best.

I am based in Munich, hold an EU Blue Card and can start on 15 November 2026. I am happy to travel to portfolio companies. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
