Application for Data Scientist - Marketing

Dear Hiring Team,

I am writing to apply for the Data Scientist - Marketing position at trivago. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, with a data science and forecasting background that fits a team measuring and steering marketing spend.

My first data science role was at Covestro, where I built and compared Random Forest, XGBoost and LSTM models on sensor time-series data. I engineered lag features and rolling windows, benchmarked the models against the empirical curve-fitting the chemists already used, and gave them a Streamlit dashboard to simulate parameter changes before running a batch. Before that, I built ARIMA, SARIMA, Prophet and LSTM load-forecasting models at Cognizant. Python and SQL are my daily tools, and I have not yet worked with BigQuery in production.

At Kniit I was the sole developer of a knowledge-extraction pipeline and reported to the CTO. I raised precision and recall from 33% and 45% to 93% and 90%, measured against a ground truth derived from the client's SAP system, and replaced an LLM-heavy step with deterministic code that cut a projected $200,000 budget to near-zero running cost. At Covestro I worked with business stakeholders to turn their decision workflows into a deployed application on AWS with Docker and GitLab CI/CD. Explaining results to non-technical people and putting models into production are both part of how I work.

Attribution, incrementality and media mix modelling are new to me professionally. I would be building that knowledge on top of a solid base in modelling, evaluation and productionising models.

trivago's focus on measuring every euro against the P&L, with data scientists owning models that steer bidding and budget decisions, is the kind of work I want to do. Being measured on impact rather than methodological sophistication suits how I prefer to work.

I am based in Düsseldorf, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
