Application for Applied AI Engineer, Digital Natives

Dear Recruiting Team,

I am writing to apply for the Applied AI Engineer, Digital Natives position at OpenAI. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the work I enjoy most is taking an agent from a first prototype to something the people around it trust enough to use.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO and working with SAP domain experts. I built a multi-agent extraction pipeline in LangGraph and evaluated it against a ground truth derived from SAP data; precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source a model was the wrong tool: a deterministic pipeline cut a projected $200,000 LLM budget to almost nothing while pushing accuracy toward 100%. That is the kind of cost and reliability decision the role describes.

Getting it into production meant more than the model. I built Expert Interface, a web app on Azure where domain experts approve changes to the knowledge graph, and a Model Context Protocol service that gives agents fast retrieval over the same graph. At Covestro I advised business stakeholders on where agentic AI could support their decisions, then built and deployed the application with LangGraph, React, FastAPI, Docker and AWS CDK. My Master's thesis there was about evaluation too: automated RAG evaluation with RAGAS and PytrecEval against answers from Covestro's chemists.

OpenAI opened its first German office in Munich and has since confirmed a second in Berlin, calling Germany one of its fastest-growing markets. Working hands-on with customers on real deployments, and feeding what breaks back into the product, is where I would be most useful.

I am based in Munich, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 and improving; I work in English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
