Application for Data Scientist (m/f/d)

Dear Hiring Team,

I am writing to apply for the Data Scientist position at KARL STORZ. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most of it on data pipelines that turn messy documents and sensor data into results that domain experts can use.

At Kniit I was the sole developer of a knowledge-extraction pipeline for the German energy sector, from ingestion and chunking to indexing. I worked with SAP domain experts and reported to the CTO. Multi-agent extraction on regulatory and technical documents took precision and recall from 33% and 45% to 93% and 90%, measured against ground truth derived from the SAP system. For a second high-volume source I wrote a deterministic, code-based pipeline that cut a projected $200,000 LLM budget to near-zero running cost. This is the kind of work your posting describes: unstructured text and files, sourced from several systems, with quality measured.

At Covestro I worked as a data scientist and later as an AI consulting intern. I built Random Forest, XGBoost and LSTM models on sensor time series and put them into a Streamlit dashboard so chemists could test parameter changes before running a batch. In the consulting role I talked with business stakeholders about their decision workflows and turned that into a working application on AWS. I am used to explaining technical limits to people who do not write code.

On the data engineering side, my day-to-day tools are Python, SQL, Postgres and Azure. I have not yet used Databricks in a job. I am building a small Databricks project with PySpark, Delta tables and automated data quality checks to close that gap, and I learn new platforms quickly.

KARL STORZ stands out to me because the data work sits close to a product that surgeons use. Building data products for Global Sales and the international subsidiaries, and tracking whether people actually adopt them, is a part of the role I would like to own.

I am based in Stuttgart, hold an EU Blue Card and can start on short notice. Thank you for considering my application. I would be glad to walk you through my work in an interview.

Kind regards,

Chandu Prasad Bhairapu
