Application for Machine Learning Engineer

Dear Hiring Team,

I am writing to apply for the Machine Learning Engineer position at SumUp. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently RAG and agent systems that run in production. Improving customer support with LLMs is the kind of problem I want to work on.

At Kniit I was the sole developer of a multi-agent extraction pipeline built with LangGraph and LangChain. I measured it against a ground truth derived from SAP systems and raised precision and recall from 33%/45% to 93%/90%. For a second, high-volume data stream I replaced the LLM calls with deterministic code, which cut a projected $200,000 LLM budget to near-zero recurring cost. I also built an MCP service that serves the knowledge graph with millisecond latency, so I think about cost, latency and accuracy together.

My master's thesis at Covestro was on evaluating RAG systems. I automated generation and retrieval evaluation with RAGAS and PytrecEval, benchmarked multilingual embedding models on more than one million chunks, and fine-tuned models for retrieval. Preparing and cleaning large text datasets was a large part of that work.

On the engineering side, I ship with Git, GitLab CI/CD and Docker. At Covestro I deployed an agentic application to AWS with CDK, and at Kniit I run Python microservices on Azure and Kubernetes. I have not yet used MLflow, Airflow or Langfuse in a production role; I pick up tooling quickly and have worked with RAGAS and PytrecEval for evaluation.

SumUp serves more than 4 million merchants in over 35 markets, and a support assistant at that scale has to be accurate, fast and cheap to run. I would like to help build it. Working with data scientists, backend engineers and product managers, as the role describes, is how I have worked at Kniit with the CTO and SAP experts.

I am based in Berlin. I hold an EU Blue Card, can start immediately, and am happy to work from your Berlin office. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
