Application for Voice AI Product Engineer (f/m/d)

Dear eGroup team,

I am writing to apply for the Voice AI Product Engineer position at eGroup. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I like owning a product from the first conversation with users to the version they rely on.

At Kniit, a start-up for the German energy sector, I was the only developer of an agentic knowledge-extraction system and reported directly to the CTO. There was nobody to wait for, so I talked to the SAP domain experts myself, designed the agent logic in LangGraph and built evals against a ground truth derived from SAP system data. Precision and recall went from 33% and 45% to 93% and 90%. I also learned that not every problem should go to a model: for a second, high-volume data stream a plain code pipeline cut a projected $200,000 LLM budget to near zero. The users got a React and Python web app on Azure where they review and approve every change before it lands.

AI-first development is how I work every day. I built an MCP service that exposes our knowledge graph as tools with millisecond-latency retrieval and plugged it into Claude Code with custom skills, so the agent could look things up while it wrote code. Before that, at Covestro, I turned business stakeholders' decision workflows into an agentic assistant with a React frontend and FastAPI backend, containerized with Docker, deployed to AWS with CDK and versioned in GitLab CI/CD. My master's thesis was about evals: automated RAG evaluation with RAGAS and PytrecEval against expert ground truth.

What draws me to eGroup is Audelia: a voice agent answering calls for freelancers and small businesses, where a bad prompt or a slow turn is noticed immediately. Speech recognition, TTS and real-time latency are what I would learn first, on top of the prompt, tool and eval work I already do; Java and Angular would be new to me.

I will be based in Berlin, hold an EU Blue Card and can start on 15 November 2026. My English is business fluent and my German is B1. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
