Application for Junior Data Scientist

Dear Hiring Team,

I am writing to apply for the Junior Data Scientist position at Almedia. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including predictive models on process data and, most recently, a production extraction system that I scored against a ground truth.

You want models that run in production and a habit of asking which number matters. At Kniit I was the only developer of a knowledge-extraction pipeline for German energy-sector documents. I measured every change against a ground truth taken from SAP data, looked at where the output was wrong, and fixed the cause. Precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source I replaced the LLM calls with deterministic code, which cut a projected $200,000 LLM budget to almost nothing.

My modelling background is classical ML. At Covestro I built and compared Random Forest, XGBoost and LSTM models on sensor time-series to predict prepolymer synthesis outcomes, engineered lag and rolling-window features, and benchmarked them against empirical curve fitting. A Streamlit dashboard let chemists see predictions before running a physical batch. At Cognizant I developed ARIMA, SARIMA, Prophet, XGBoost and LSTM models for EV load forecasting. I work in Python and SQL daily, with Postgres behind the data and pipelines I built and maintained, and I use Claude Code with custom skills to move faster while checking what it writes.

I have not run A/B tests on live traffic. What I have is the evaluation side: scoring retrieval and generation with RAGAS and PytrecEval against chemist-provided ground truth, and benchmarking embedding models on more than one million chunks. I would like to apply that care to offers, rewards and ranking at Almedia.

Almedia interests me because you are profitable and bootstrapped, and a small team owns models that millions of users see in Freecash. Getting real problems from week one is how I learn best.

I am based in Berlin, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
