Application for Data & AI Consultant

Dear Hiring Team,

I am writing to apply for the Data & AI Consultant position at Netlight. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most of it together with business experts who knew the problem better than I did at the start.

At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector, reporting to the CTO and working with SAP domain experts. I built a multi-agent LangGraph system for extraction over complex regulatory documents and raised precision and recall from 33%/45% to 93%/90%, measured against ground truth from the customer's SAP system. For a second, high-volume source I replaced the LLM calls with a code-based pipeline, which cut a projected $200,000 LLM budget to near-zero running cost. I also built a Python and FastAPI backend with a React web app on Azure so the experts can approve changes to the knowledge graph themselves.

At Covestro I spent my AI consulting internship talking to business stakeholders about their decision-making workflows, advising where agentic AI could help, and turning that into a LangGraph application. I containerized it with Docker, deployed it to AWS with CDK and ran it through GitLab CI/CD. My thesis there compared RAG systems against chemist-provided ground truth on more than one million chunks, and an earlier internship ended with a Streamlit tool that chemists used to test parameter changes. I have not run Spark or streaming pipelines in a job yet, and I have used Azure and AWS but not GCP or StackIT.

Netlight appeals to me because the role is shaped around the consultant instead of handed over as a fixed description, and because the Anthropic partnership means Claude is part of client work. I use Claude Code every day and check what it produces. Explaining technical trade-offs to non-technical people is something I already do with the SAP experts and chemists.

I am based in Hamburg, hold an EU Blue Card and can start on 15 November 2026. I am happy to travel to client sites. My working language is English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
