Application for Data Scientist: Advanced Analytics & AI Engineer in Insurance

Dear Hiring Team,

I am writing to apply for the Data Scientist: Advanced Analytics & AI Engineer position at HDI Group. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the part of that work I enjoy most is getting a system running reliably on AWS after the prototype works.

At Covestro I built an agentic AI application with LangGraph, containerized it with Docker and deployed it to AWS with CDK, using GitLab CI/CD pipelines. During my thesis I defined the AWS infrastructure for a RAG evaluation service (Lambda, SQS, DynamoDB) as code with CDK as well. So infrastructure as code, automated deployment and GitLab CI are things I have done in practice, though with CDK rather than Terraform.

At Kniit I was the sole developer of a knowledge-extraction system for the German energy sector. I worked with Docker, Kubernetes and Azure, kept recurring model cost close to zero by replacing LLM calls with a deterministic pipeline where that was possible, and worked directly with the CTO and domain experts on what the system needed to do. That experience of supporting a team and answering for a running service is what your role asks for.

I should be open about the gaps. I have not run Terraform, ArgoCD or GPU workloads in production, and I have not worked with Amazon Bedrock or SageMaker yet. I know the monitoring and cost-control side mostly from the application level. I learn infrastructure tooling quickly, and I would be glad to do it in a team that already has a central platform and cloud organisation to learn from.

Your posting describes an analytics platform in an enterprise setting with central IT governance, where AI services have to be secure, observable and affordable to run. That is a practical problem I want to work on. I am based in Cologne, hold an EU Blue Card, can start on 15 November 2026, and work comfortably in English; my German is at B1 and improving. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
