Application for Data Scientist

Dear Hiring Team,

I am writing to apply for the Data Scientist position at Senacor. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, with a steady base in machine learning, time series and the evaluation of models against ground truth.

My first data science role was an internship at Covestro, where I predicted the outcome of prepolymer synthesis from sensor time series. I prepared the process data, built lag features and rolling statistics, and compared Random Forest, XGBoost and an LSTM against the chemists' empirical curve fitting. The results helped spot batches likely to miss specification early, and a Streamlit dashboard let the chemists try parameter changes before a physical run. Before that, at Cognizant, I built ARIMA, SARIMA, Prophet and LSTM forecasting models for EV load, and the LSTM reached 96% test accuracy.

Checking results carefully is what I do most. For my Master's thesis I evaluated RAG systems with RAGAS and PytrecEval against chemist-provided ground truth and benchmarked multilingual embedding models on over a million data chunks. At Kniit I was the sole developer of a multi-agent extraction pipeline for the German energy sector. I measured it against ground truth derived from SAP systems and raised precision and recall from 33%/45% to 93%/90%. In the same project a plain code-based pipeline replaced LLM calls for one high-volume source, which removed a projected $200,000 LLM budget.

In both places I worked closely with people who were not data scientists: chemists, SAP experts and the CTO. I learned to turn their questions into something testable and to explain results in their terms.

Your posting describes data-intensive client work where the project context sets the priorities. I would like to work in that setting, with varied problems and a team that mixes strategy, business and technology.

I am based in Germany and available from 15 November 2026, I hold an EU Blue Card, and I am happy to travel to client sites. My German is B1 and I work in English every day. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
