Application for Cloud & AI Software Developer (m/w/d)

Dear Hiring Team,

I am writing to apply for the Cloud & AI Software Developer position at KOCH Pac-Systeme. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, mostly in Python on Azure and AWS, and I like turning a rough data or AI idea into a working MVP.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector. I built it end to end: ingestion, multi-agent LLM extraction with LangGraph, a graph curation web app with a React frontend and Python microservices on Azure, and a Model Context Protocol service for retrieval. Domain experts from SAP helped define what correct means, and I measured the system against a ground truth built from SAP data, which raised precision and recall from 33% and 45% to 93% and 90%. Where an LLM was not needed I used plain code and cut a projected $200,000 LLM budget to almost nothing.

On the cloud side, I containerized a LangGraph application with Docker at Covestro and deployed it to AWS with CDK and GitLab CI/CD. There I also worked with business stakeholders to understand their decision workflows and turn them into requirements, which is close to the internal advisor role you describe. In my internship I predicted batch outcomes from sensor time series, so process data from machines is not new to me.

I have not worked with .NET, Databricks or Beckhoff TwinCAT PLC programming, and my experience is in Python rather than .NET. I would pick these up quickly from the team.

Your plan to bring Data & AI products into customers' packaging lines is a concrete use case: the data comes from the machines, and the result has to run reliably next to them. That is the kind of work I want to do.

I am based in Stuttgart, hold an EU Blue Card and can start on 15 November 2026. I am happy to travel to customer sites. My English is business fluent and my German is at B1 level and improving. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
