Application for Data Scientist & ML Engineer - Predictive Analytics & Agentic AI

Dear Hiring Team,

I am writing to apply for the Data Scientist & ML Engineer - Predictive Analytics & Agentic AI position at Intersnack IT KG. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, from classical forecasting models to LLM-based agents.

My first role at Covestro was a data science internship. I built Random Forest, XGBoost and LSTM models to predict the outcome of prepolymer syntheses from sensor time series, with lag features and rolling windows, and compared them with the empirical curve fitting the chemists used before. I also built a Streamlit dashboard so chemists could change process parameters and see the predicted result before running a physical batch. That taught me how much a model depends on whether the people using it trust it. Earlier, at Cognizant, I built ARIMA, SARIMA, Prophet and LSTM models for electric vehicle load forecasting.

On the LLM side, I was the sole developer of a knowledge-extraction pipeline at Kniit for the German energy sector. Multi-agent extraction with LangGraph, measured against ground truth from the SAP system, raised precision and recall from 33

At Covestro I also worked as an AI consulting intern. I talked to business teams about how they make decisions, then built an agentic application with LangGraph and FastAPI and deployed it to AWS with CDK and GitLab CI/CD. I have not yet worked with Azure ML or SageMaker, or with feature stores and optimisation solvers in a job. My Azure and AWS deployment experience should carry over, and I would pick up the rest quickly.

Intersnack stood out to me because the role puts models into production for procurement, manufacturing and sales across 45 production sites, and asks for them to feed agentic workflows instead of staying in notebooks. That is the kind of work I want to do next.

I am based in Düsseldorf, hold an EU Blue Card, and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
