Application: AI Engineer (m/w/d)

Dear HERMES Team,

I am writing to apply for the AI Engineer position at the HERMES Group. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and what I enjoy most is turning a business process into an AI solution that people can rely on.

As the holding company, HERMES provides shared functions to HERMES ARZNEIMITTEL, HERMES PHARMA and Bad Heilbrunner. That makes reusable agents and common standards especially valuable, because a good solution can serve three companies instead of one, and in a GMP-regulated business, quality and stable operation matter as much as the AI itself.

At Kniit GmbH I am the only developer on an AI agent system for the German energy sector. Several agents work in parallel to extract knowledge from regulatory and technical documents, and I tested them against ground truth from SAP systems until precision and recall went from 33% and 45% to 93% and 90%. Domain experts review and approve the results in Expert Interface, a web app I built and deployed on Microsoft Azure.

A large part of my work has been connecting AI to people's processes and to other systems. In my second internship at Covestro, an AI consulting role, I worked with business stakeholders on their decision-making workflows, designed an agentic solution with them and then built it with a FastAPI backend and a React frontend. At Kniit I also built an MCP service that connects the knowledge graph as a data source and is integrated into Claude Code.

Working with scientists is familiar to me. At Covestro I tested an AI assistant over internal chemical documents against answers written by chemists, and built a Streamlit app where chemists could try parameter changes before running a batch.

Power Automate, Power Apps and Copilot Studio are new to me; I have not used them in a job yet. I have built the same kind of logic in code (agents, workflows and API integrations) and have deployed on Azure, so I expect to get productive with the Microsoft low-code tools quickly.

I will be based in Munich, hold an EU Blue Card and can start from 15 November 2026. My German is at B1 level.

Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
