Application: AI Engineer

Dear Recruiting Team,

I am writing to apply for the AI Engineer position at adesso. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the part of the work I like best is sitting with a customer, understanding what they actually need, and turning that into something that works.

My second internship at Covestro was an AI consulting role. I worked with business stakeholders on their decision-making workflows, advised them on how agentic AI could help, and then designed and built the application with LangGraph, a FastAPI backend and a React frontend, deployed to AWS with Docker, CDK and GitLab CI/CD.

At Kniit GmbH I am the only developer on an LLM-based knowledge-extraction system for the German energy sector. I work with SAP domain experts on what the system needs to deliver and report directly to the CTO. I tested the agents against ground truth from SAP systems and raised precision and recall from 33% and 45% to 93% and 90%. For a second, high-volume data source I built the deterministic, code-based pipeline that was used instead of an LLM approach, which brought a projected $200,000 LLM budget down to almost no running cost.

I also make sure AI output is checked before people rely on it. At Kniit, domain experts review and approve changes in a web app I built on Azure, and in my master's thesis at Covestro I automated the evaluation of a RAG system against answers written by chemists.

Your posting describes engineers who work with customers in mixed teams of AI, software and industry people, and who look for where technology can improve a process. That is how I have worked so far, next to the chemists at Covestro and the SAP experts at Kniit who use what I build, and it is the setting I want to keep working in.

I am based in Germany, hold an EU Blue Card and can start from 15 November 2026. I work fully in English and speak German at B1 level.

Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
