Application for Software Engineer

Dear Hiring Team,

I am writing to apply for the Software Engineer position in Focused Energy's Software Department in Berlin. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including internal tools that domain experts use to get their own work done.

Your forward deployed model is close to how I already work. At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO and working with SAP domain experts. I built Expert Interface for them, a web application with a React frontend and Python microservices on Azure, where the experts check and approve changes to the knowledge graph. I also set up the evaluation: precision and recall against a ground truth from SAP data went from 33% and 45% to 93% and 90%.

I have also built for scientists. As a data scientist intern at Covestro I gave chemists a Streamlit dashboard where they could change process parameters and see predicted synthesis outcomes before running a physical batch. Later, as an AI consulting intern there, I built a React front-end and FastAPI back-end, containerised the stack with Docker and deployed it to AWS with CDK through GitLab CI/CD.

My main language is Python, not TypeScript. I have written React frontends and worked with Postgres, MongoDB and Neo4j, and I work with Claude Code, custom skills and agentic coding workflows, and review the output like any other code. I would expect to be productive in your TypeScript codebase quickly through small shipped changes and code review.

Focused Energy raised a $240 million Series A in May 2026, much of it going to the former RWE power plant site in Biblis. A company scaling that fast needs internal software for scientists, finance and legal that is tested, documented and easy to hand over, and that is the work I want to do.

I will be based in Berlin, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
