Application for Technical Success

Dear Recruiting Team,

I am writing to apply for the Technical Success talent pool at OpenAI in Munich. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the part of that work I enjoy most is sitting with the people who will use a system and working out what it has to do for them.

At Covestro I did this as an AI consulting intern. I worked with business stakeholders to understand how they made decisions, advised them on where an agent could support those decisions, and turned that into a LangGraph application that routes each request between vector database queries, general inference and summarization. I built the React front-end and FastAPI backend and deployed the stack to AWS with Docker and CDK.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector, reporting to the CTO and working with SAP domain experts. What carried over to customer work was measuring first. I evaluated the extraction against a ground truth built from SAP data, and precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source the honest answer was that a model was the wrong tool: plain code cut a projected $200,000 LLM budget to almost nothing while pushing accuracy toward 100%.

The experts only used the system once they could check it. I built Expert Interface, a web app on Azure where domain experts review and approve changes to the knowledge graph, and a Model Context Protocol service that gives agents fast access to the same graph. My Master's thesis was about evaluation as well: automated RAG evaluation with RAGAS and PytrecEval against answers from Covestro's chemists.

OpenAI opened its first German office in Munich and has since confirmed a second in Berlin, calling Germany one of its fastest-growing markets. The posting says engineering-focused roles call for hands-on integration, debugging and production delivery, and that is where I would be most useful to German customers.

I will be based in Munich, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 and improving; I work in English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
