Application for Data Engineering Consultant

Dear Hiring Team,

I am writing to apply for the Data Engineering Consultant position at QuantumBlack, AI by McKinsey, in Düsseldorf. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and the part I care about most is the data layer underneath LLMs and agents.

At Kniit I am the only developer of an agentic knowledge-extraction pipeline for the German energy sector and report to the CTO. I own it end to end: ingesting unstructured regulatory and technical documents, preparing and chunking them, prompt engineering and indexing them into a knowledge graph. With a LangGraph multi-agent design, measured against a ground truth derived from SAP data, precision and recall went from 33% and 45% to 93% and 90%. For a second, high-volume source I built a deterministic pipeline instead of an LLM one, which cut a projected $200,000 LLM budget to near-zero recurring cost. I then exposed the graph through a Model Context Protocol service with millisecond retrieval, integrated with Claude Code, which I also use as a coding agent.

My Master's thesis at Covestro evaluated RAG systems. I benchmarked multilingual embedding models on more than a million chunks of internal chemical data, designed RAG pipelines around chunking, vector databases and indexing, and automated their evaluation with RAGAS and PytrecEval on AWS infrastructure (Lambda, SQS, DynamoDB) that I defined with CDK. As an AI consulting intern I then worked with business stakeholders on their decision workflows and deployed a LangGraph application with Docker on AWS, with CI/CD in GitLab.

The gaps are on the classic platform side: I have not yet used Spark, dbt or Terraform in a job; my infrastructure as code so far is AWS CDK. These are the tools I want to master next, and a team that builds data foundations for agentic systems across industries is where I would learn them fastest.

I will be based in Düsseldorf, hold an EU Blue Card, am glad to travel to client sites and can start on 15 November 2026. My German is at B1 level and my English is business fluent. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
