Application for Data Scientist (m/w/d)

Dear Hiring Team,

I am writing to apply for the Data Scientist position at ALDI Nord Group. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including forecasting and machine learning models on business and process data.

My most relevant data science work was at Covestro, where I predicted the outcome of prepolymer syntheses from sensor time series. I engineered lag features and rolling statistical windows for Random Forest and XGBoost models, trained an LSTM on the raw sequences, and validated all of them against the empirical curve-fitting the chemists already used. The result was earlier identification of batches likely to miss specification. I put the predictions into a Streamlit dashboard so that chemists, who are not data scientists, could test parameter changes before running a physical batch. Before that, at Cognizant, I built ARIMA, SARIMA, Prophet, XGBoost and LSTM forecasting models for EV load.

At Kniit I am the only developer of a knowledge-extraction system for the German energy sector. I measured every change against a ground truth from the customer's SAP system, and precision and recall rose from 33% and 45% to 93% and 90%. That is the habit I would bring to monitoring and improving models at ALDI Nord: experiment, validate, and report the numbers plainly to people who need a decision, not a method. I work in Python and SQL, use Git and GitLab CI/CD, and have built backends with Postgres and Docker on AWS and Azure.

I should be clear about the gaps. I have not used Databricks, Spark or MLflow in a job, and I have not built Power BI dashboards. These are the tools I would need to learn first. My German is B1, below the B2 you describe as desirable.

ALDI Nord appeals to me because the data comes from everyday retail: transactions, operations and customers, at a scale where a better forecast changes real orders. I would like to work on problems like that with a Data Engineering team close by.

I am based in Essen, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
