Application for Software Engineer

Dear Hiring Team,

I am writing to apply for the Software Engineer position at QuantumBlack, AI by McKinsey, in Frankfurt. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and what I enjoy most is turning an AI prototype into a product people actually use.

At Kniit I am the only developer of an agentic knowledge-extraction product for the German energy sector and report to the CTO. I built the whole thing: ingestion and chunking of regulatory documents, a LangGraph multi-agent extraction pipeline, a Model Context Protocol service that exposes the knowledge graph to Claude Code, and the Expert Interface, a React and Python microservices app on Azure where domain experts approve graph changes. Measured against a ground truth derived from SAP data, precision and recall went from 33% and 45% to 93% and 90%. For a second high-volume source I wrote a deterministic pipeline instead of an LLM one, which cut a projected $200,000 LLM budget to near-zero recurring cost.

At Covestro I worked in a consulting setting. I sat down with business stakeholders to map how they make decisions, then built and deployed a LangGraph agent with a React front end and a FastAPI backend, containerized with Docker, deployed to AWS with CDK and shipped through GitLab CI/CD. My Master's thesis there evaluated RAG systems with RAGAS and PytrecEval, which taught me to treat evaluation as part of the delivery rather than an afterthought.

QuantumBlack appeals to me because engineers build products with clients and also coach their teams on engineering practice. I like explaining how I work and learning from people who do it differently, and the apprenticeship culture you describe fits that. The gap I see is that I have not worked in a large pair-programming consultancy team, and my front-end depth is React rather than Angular or Vue.

I am based in Frankfurt, hold an EU Blue Card, am glad to travel to client sites and can start on 15 November 2026. My German is at B1 level and my English is business fluent. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
