Application for AI & Knowledge Graph Engineer (m/w/d)

Dear Hiring Team,

I am writing to apply for the AI & Knowledge Graph Engineer position at d.u.h.Group. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently a knowledge graph with agents on top of it for the German energy sector.

At Kniit I am the sole developer of a pipeline that extracts entities and relationships from regulatory and technical documents into a Neo4j knowledge graph. I built it as a multi-agent LangGraph system and raised precision and recall from 33%/45% to 93%/90% against ground truth derived from the customer's SAP system. On top of the graph I built an MCP query service with millisecond retrieval, which we use from Claude Code, and a React and Python web app on Azure where domain experts approve changes to the graph. I worked with SAP domain experts to turn their requirements into this design.

Earlier, at Covestro, I built an agentic LangGraph application with a React front end and a FastAPI backend, containerized it with Docker and deployed it to AWS with CDK and GitLab CI/CD. During that consulting internship I sat with business stakeholders, learned how they make decisions and shaped the solution around that. My thesis covered RAG: I automated retrieval evaluation and benchmarked embedding models on more than one million chunks. I also built a small knowledge graph with RDF, OWL and SPARQL in Protégé and rdflib during my studies.

d.u.h.Group is building a new field around Siemens ICX, knowledge graphs and agentic AI, and that is the kind of work where I want to be. Connecting data from systems like SAP and PLM and turning it into working proofs of concept for customers is close to what I do today. I have not used Siemens ICX or Mendix yet, and would learn them on the job.

I am based in Saarbrücken, hold an EU Blue Card and can start on 15 November 2026. My German is at B1 level and improving; my working language is English. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
