ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software development. Specialized in agentic LLM systems with tool calling and MCP, backed by Python backend services, REST APIs, PostgreSQL and containerized deployment on Azure and AWS. Most recently sole developer of an agentic knowledge-extraction system for the German energy sector, working directly with domain experts and the CTO from problem discovery to a running web application.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present Muldestausee, Germany

- Sole developer owning the full lifecycle of the knowledge-extraction pipeline end-to-end – data ingestion, chunking, prompt engineering, and indexing (agentic, deterministic, and monolithic strategies) – reporting directly to the CTO and collaborating with SAP domain experts across the German energy sector.
- Designed and implemented a custom Model Context Protocol (MCP) server exposing the knowledge graph to LLMs as tools for millisecond-latency retrieval, integrated directly into Claude Code for agentic development workflows.
- Designed and optimized multi-agent LLM workflows (LangGraph: entity-extraction, relationship-analysis, consolidation, and reflection agents running in parallel) for knowledge extraction from complex regulatory and technical documents, driving precision/recall from 33%/45% to 93%/90% via an SAP-system-derived ground truth.
- Engineered a deterministic (code-based) extraction pipeline for a second, high-volume source stream, replacing LLM calls where reliability and cost mattered and cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing extraction accuracy toward 100%.
- Developed Expert Interface, a graph curation web app (React frontend, Python microservices backend) deployed on Azure, enabling domain experts to validate and approve knowledge-graph changes.
- Delivered as an AI-augmented engineer – using Claude Code daily, with custom skills and agentic coding workflows, for rapid, high-quality development grounded in clean code principles.
- **Tech stack: Python, FastAPI, MCP, LLM APIs, LangGraph, LangChain, LiteLLM, REST APIs, Postgres, MongoDB, Neo4j, GraphRAG, RAG, Vector Search, React, Docker, Kubernetes, Azure**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 Leverkusen, Germany

- Developed a Python backend with FastAPI and a React-based front-end, leveraging Postman for API testing.
- Built and containerized the entire stack with Docker and deployed it to AWS using CDK, adhering to clean code practices. Version-controlled via GitLab, with CI/CD integration.
- Designed and deployed an agentic AI application using LangGraph to optimize decision-making workflows for vector database queries, general inference, and summarization tasks, working with business stakeholders to understand their workflows and translate requirements into the solution.
- **Tech stack: Python, FastAPI, Docker, AWS, CDK, EC2, Lambda, GitLab, GitLab CI/CD, React, LangGraph, LangChain, Postman**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 Leverkusen, Germany

- Automated RAG's Generation and Retrieval evaluation with RAGAS and PytrecEval, comparing model answers to chemist-provided ground truth.
- Built AWS cloud infrastructure with Lambda, SQS, and DynamoDB for PrismaChat RAG evaluation using CDK.
- Benchmarked multilingual embedding models on over 1M data chunks of Covestro's internal chemical data.

- Designed RAG pipelines, focusing on chunking strategies, vector databases, indexing, and fine-tuning models for optimized retrieval.
- **Tech stack: Python, Scikit-Learn, PyTorch, TensorFlow, LangChain, Hugging Face Transformers, RAGAS, PytrecEval, AWS (S3, EC2, VPC, Lambda, SQS, DynamoDB, CDK), Azure AI Search, Docker, Streamlit, Vector Databases**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost, and LSTM models to predict prepolymer synthesis outcomes (e.g. viscosity, reaction progression) from time-series process data, evaluating tree-based vs. deep learning approaches for this tabular/temporal hybrid problem.
- Engineered lag features and rolling statistical windows from raw sensor time-series (temperature, reaction time, process variables) to feed the tree-based models, while feeding raw sequences directly into the LSTM.
- Benchmarked model performance against traditional empirical curve-fitting methods, improving early identification of batches likely to deviate from target specification.
- Deployed an interactive Streamlit dashboard exposing model predictions to chemists in real time, letting them simulate parameter changes and see predicted outcomes before running physical batches.
- **Tech stack: Python, Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, SciPy, Matplotlib, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XG-Boost regressor, FB Prophet, LSTM models for time series analysis for EVs.
- Developed LSTM, achieved 96% test accuracy and strong performance on unseen data.
- **Tech stack: Python, Scikit-Learn, TensorFlow**

PROJECTS

Project: Onboarding & Ops Assistant | TypeScript | Node.js | MCP | Postgres | Slack

- Internal AI assistant for operations: MCP server in TypeScript (Node.js) with Zod-typed tools over synthetic support-ticket and customer-record data in Postgres, Slack bot via signed webhooks, approval step for a human before any ticket is drafted, PII masking before model calls, and an eval set in GitHub Actions.

TECHNICAL SKILLSET

- **Programming:** Python, SQL
- **AI & Agents:** LLM APIs, Agentic Workflow (LangGraph), MCP, RAG, NLP (LangChain, Hugging Face transformers, NLTK), Claude Code
- **Backend & Web:** FastAPI, REST APIs, Postman, Docker, React(beginner)
- **Databases:** Postgres, SQL, SPARQL, Vector Databases(Qdrant, Pinecone, Azure AI Search)
- **Cloud & DevOps:** Azure, AWS- S3, EC2, Lambda, SQS, Load balancer, DynamoDB, VPC, CDK; Git, GitLab CI/CD, Kubernetes
- **Methodologies:** Agile

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Minor in Computer Science & Engineering — July 2019 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

LANGUAGES & PUBLICATION

German (B1) | English (Business Fluent) | Hindi (Fluent) | Telugu (Native)
